

Rivé Apartments, Breakfast Creek

Distinctive style...

Rivé Apartments is a spectacularly designed new master-planned community that will maximise the aspect, location, appeal and views of the site. The two towers divide the site into individual development parcels, each with their own specific planning designs.

The site will be linked by the recreational facilities of outdoor swimming pools with lap lanes, sun decks, water features and space to stretch out and relax. The transformation of the site will be enhanced by the majestic beauty of century old fig trees.

The distinctive architectural style has been designed to ensure that the natural elements of light and breezes flow through the apartments, balconies and terraces. A cohesive beauty of form and function are incorporated with the use of large overhangs, screen devices and expansive openings.

All services designed will be fully compliant with the energy efficiency requirement of the Building Code of Australia, which govern the operation and efficiencies of equipment used to deliver the services.
